

Installation

- Download `binaryen` from <https://github.com/WebAssembly/binaryen>
- Install it using `cmake . && make`
- Download EMCC SDK from https://kripken.github.io/emscripten-site/docs/getting_started/downloads.html#sdk-downloads
- Install platform specific requirements from http://kripken.github.io/emscripten-site/docs/getting_started/downloads.html#platform-notes-installation-instructions-portable-sdk
- Install EMCC compiler following the instructions from http://kripken.github.io/emscripten-site/docs/getting_started/downloads.html#all-os-installation-instructions-portable-sdk
- To verify everything installed run `emcc -v`
